FOR IMMEDIATE RELEASE

North American Composites Achieves OHSAS Certification

(St. Paul, MN – September 10, 2015) Jerry Davis, Vice President of Operations for North American Composites (NAC), an operating business of IP Corporation, announced today they have achieved OHSAS 18001:2007 (Occupational Health & Safety Management System) certification for the company's warehouse operations.

NAC also successfully obtained recertification in ISO 9001:2008 (Quality Management System). This standard represents an international consensus on good management practices, policies, and procedures with the aim of ensuring that an organization, time and time again, delivers the products and services that meet the customer's quality requirements.

We are pleased to announce that, once again, we have successfully completed surveillance audits to maintain our certification to ISO 14001:2004. This standard sets out the criteria for an environmental management system. Adherence to ISO 14001:2004 certification requirements provides assurance to company management, employees, and external stakeholders that environmental impacts are being identified, measured and appropriately addressed.

About NAC

North American Composites, with operations across the U.S. and Canada, is a full-service supplier of composite raw materials. NAC serves manufacturers in marine, cast polymer, corrosion, construction, consumer and related composites industries. NAC partners with more than 150 raw material suppliers to bring its manufacturing customers the best products the industry has to offer. In addition, NAC provides its customers with a wide range of service in manufacturing equipment, process development and regulatory assistance.
